**Basis of Test:** DIN EN 15821:2011-01

**Test Report:** W-O 1339-00/12 dated 2012-06-04  
W-O 1341-00/12 dated 2012-06-11

Excerpts from this document may only be reproduced and used for advertising purposes with the express written approval of TÜV SÜD Industrie Service GmbH.

The essential characteristics according to appendix ZA.1 of DIN EN 15821 for sauna stoves fired by natural wood logs were tested and the requirements are fulfilled, if the measures in the mentioned test report have been taken into account.

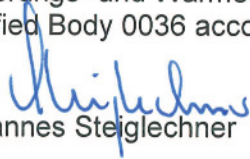

The test results refer exclusively to the units under test.

The requirements of the German 1. BImSchV, appendix 4, level 2 for roomheaters according EN 13240 are fulfilled:

CO	≤	1,25 g/m <sup>3</sup> (O <sub>2</sub> -Value 13%)
Dust	≤	0,04 g/m <sup>3</sup> (O <sub>2</sub> -Value 13%)
η	≥	73 %

The results in detail, the evaluation of the results and the conclusions out of the results are described in the above mentioned test reports.
